Dear Sir

Re: New revenue streams for 2008/9

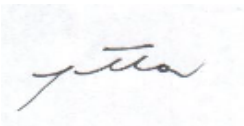

Forge's wholly owned subsidiary, Cimeco Pty Ltd has received letters of intent from Clough and NewGen Power Pty Ltd whereby Cimeco will provide supply, fabrication and installation services for their Devil's Creek and Neerabup Gas Pipeline projects respectively. Cimeco is also currently providing construction and maintenance services on Barrow Island for Chevron.

Management is pleased to advise shareholders of this development as the company has traditionally provided such services to base and precious metal processors. With arguably stricter construction credentials required for the oil and gas providers Cimeco feels confident of being able to capitalise on significant growth in this area in the future.

Forge also wishes to announce the award of the General Services and Minor Earthworks contract at Worsley for the contract sum of \$10.5 million. This award is also particularly pleasing as Cimeco will provide services as part of the Efficiency and Growth Project and be one of the first contractors on site for the substantial facilities upgrade for Worsley Alumina Pty Ltd.

The company's operations in Ghana continue to provide steady revenue and income streams with a full order book in West Africa for the first half of 2008/9.

Yours sincerely

Peter Hutchinson
Managing Director
